**Filling Station - 3**

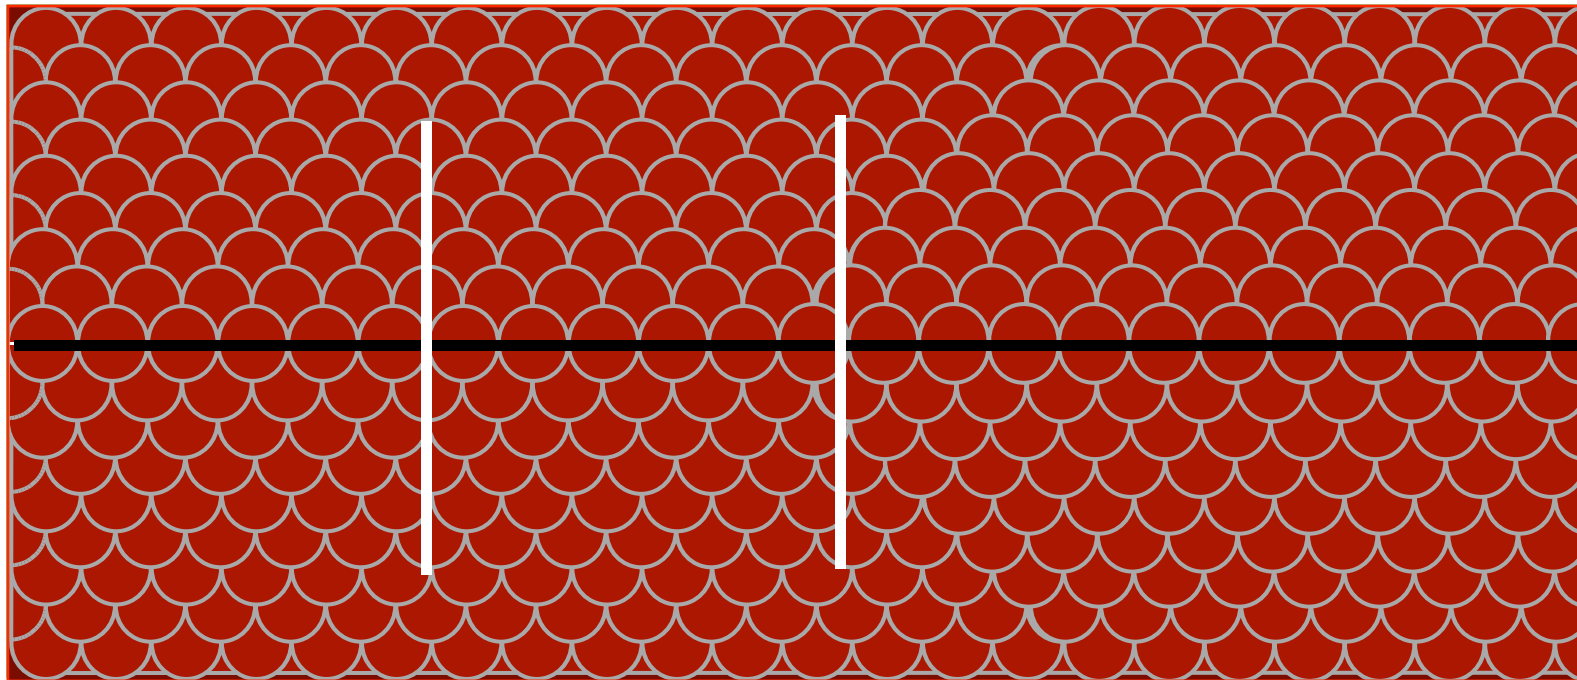

**To assemble:**

- Cut the building from this sheet with scissors. Cut slits carefully with hobby knife.
  - Fold and gently crease tabs, corners of building, roof panels and bottom flaps.
  - Slip tabs into slots. Save bottom flaps until last.
  - Fold bottom flaps under in numerical order. Flap 4 is last and should tuck under Flap 1 to hold them all in place. Use glue or tape for permanent assembly.
- For more ideas and inspiration, visit [www.meddybemps.com/trains/village.html](http://www.meddybemps.com/trains/village.html).

← Cut out. Fold in half. Slip starred ends through slits in upright signs after you slide roof onto building and gas pumps.

↙ Cut out along red lines.

↑ Cut slits along the white lines for signs to slide through. Make the openings wide to allow signs to slide through easily. ↑
